Dear friends,

The Tecmint.com team is pleased to announce that a long-awaited request from you has become a reality: the availability of the RHCSA (Red Hat Certified System Administrator) based on RHEL 9 and RHCE (Red Hat Certified Engineer) ebook based on RHEL 8 in PDF format.

Let us tell you why we decided to invest time, effort, and resources to provide you with this possibility.

Red Hat RHCSA/RHCE Certification Preparation Study Guide

eBook by Tecmint.com Team

RedHat RHCSA and RHCE Certification eBook Based on RHEL 9/8

Besides being committed to providing you with high-quality content, we take great pride in helping spread the knowledge of Linux and Free Open Source Software (FOSS) because 1) we believe in the philosophy, and 2) as part of our worldwide family, we want to help you advance in your career as much as we can.

This ebook, along with the official Red Hat Enterprise Linux official guides, will help you prepare to take and pass the RHCSA (EX200) and RHCE (EX294) exams.

As you know, both exams are aimed at determining if your knowledge, skills, and ability meet those required of a junior and senior administrator, respectively, of RHEL systems across a wide variety of environments and scenarios.

Becoming RHCSA and RHCE certified can help you show potential employers (and current as well) that you have what it takes to contribute to the success of their IT departments, which ultimately means the overall success of the business.

Additionally, the demand for highly qualified Linux professionals with certifications is continually on the rise. But do not take our word for it – let's take a look at a few well-known online job board sites where RHCSA and RHCE-related positions have been posted recently.

At the time of this writing (April 2024), here are the number of open positions available in each site (click on the numbers to go to the search page with results):

SITE	RHCSA – Job Positions	RHCE – Job Positions
foundit.in	8109	7837
Naukri.com	6674	7732
Indeed.com	350	421

As you can see, if you get a Red Hat certification, you are not likely to be left without job opportunities.

The RHCSA/RHCE Chapter 11 read: Firewallld & IPtables but I was under the impression that Firewallld runs on the NFtables framework starting with RHEL8? Is this not correct? Or does the RHCSA/RHCE 8 course objectives require iptables to be implemented?
